## Fiscal Note & Local Impact Statement

**Bill:** S.B. 293 of the 132nd G.A.

**Status:** As Reported by Senate Transportation, Commerce & Workforce

**Sponsor:** Sens. Peterson and Manning

**Local Impact Statement Procedure Required:** No

**Subject:** Requires state agencies to reduce the number of regulatory restrictions

---

### Fiscal Highlights

- The bill may increase state agency staffing costs to prepare inventories of regulatory restrictions and annual progress reports in meeting the bill's target of a 30% reduction in regulatory restrictions over three years. Any additional payroll costs may vary widely by agency depending on the scale of work and the staff resources state agencies use to accomplish the bill's required tasks.
- Staffing costs for the GRF-funded Joint Committee on Agency Rule Review (JCARR) may increase by about \$100,000 each year to hire an additional staff member to assist state agencies in preparing inventories of regulatory restrictions and to report on the progress of agencies in meeting the bill's targets.
- The Office of Legislative Information Systems (LIS) may incur administrative costs to develop a public-facing website to convey information about the progress of regulatory reduction by state agencies and to create and maintain a system for agencies to use to create inventories, enter regulatory restriction data, and transmit copies of inventories, reports, and other documents to JCARR and the General Assembly.

### Detailed Fiscal Analysis

#### Bill summary

The bill requires state agencies to prepare an inventory of rules containing a regulatory restriction by December 31, 2019 and to reduce the total number of their regulatory restrictions by 30% over the following three calendar years in 10% annual increments. The bill tasks the Joint Committee on Agency Rule Review (JCARR) with assisting state agencies in this effort and reporting on the state's progress toward the bill's goals. Each state agency must send JCARR its inventory of regulatory restrictions, revised annually, along with a report of its progress until the agency has met the 30% reduction target. Direct fiscal effects associated with inventory preparation and reporting are discussed below. Any fiscal effects associated with the elimination of

regulatory restrictions will depend on the particular rules each agency amends or rescinds to comply with the bill.

## **Fiscal effects**

### **Potential staffing costs**

The bill may substantially increase state agency workload to review rules, identify regulatory restrictions, and prepare the required annual progress reports, particularly for those having the largest number of rules. Of the 16,600 rules currently under JCARR's purview, over 9,000 (54%) are concentrated in ten agencies. The three state agencies with the largest number of rules are the Ohio Environmental Protection Agency (1,578), the Department of Job and Family Services (1,503), and the Department of Health (1,185). The number of regulatory restrictions may be considerably larger than the number of rules, as each rule may contain multiple regulatory restrictions.

The bill, therefore, creates the possibility of additional payroll costs for some state agencies. Such costs may vary widely depending on the number of rules an agency must review and the staff resources it uses to accomplish the bill's required tasks. For example, some state agencies may be able to rely on interns to perform some of the cataloguing work, as was the case for a similar regulatory initiative implemented by British Columbia in the early 2000s. However, given that the work may entail intricate legal considerations, it also seems reasonable that state agencies could find it necessary to add professional legal staff to handle more complex matters. Such an individual's base pay rate may range between \$25 and \$40 per hour, based on typical pay rates of lower-level attorney positions employed by executive agencies. The annual salary and benefits costs for such a position range from \$67,000 to \$115,000, depending on the single or family health insurance coverage the employee may enroll in.

Similarly, JCARR indicated that its additional workload under the bill may require the hiring of another staff member. JCARR estimated that the salary and benefits costs for a new employee would likely be around \$100,000 annually based on its experience with current staff. JCARR's current staff of four is supported by the GRF.

### **Inventory system and website creation and maintenance**

The bill requires JCARR, in consultation with the Office of Legislative Information Systems (LIS), to create and maintain a system for agencies to use to create inventories, enter regulatory restriction data, and transmit copies of inventories, reports, and other documents to JCARR and to the General Assembly. In addition, JCARR and LIS are required to develop a public-facing website to convey information about the progress of regulatory reduction by state agencies. These requirements will likely increase administrative costs for LIS, which is supported by GRF appropriation item 035410, Legislative Information Systems, under the Legislative Service Commission's budget.
