Specialty license plates

The bill creates seven new specialty license plates. The plates are available to the general public, but require a person to pay an annual contribution when the plate is issued and renewed. The contributions are deposited into the existing License Plate Contribution Fund and later disbursed to the appropriate organizations that receive the contributions. Those organizations work with the Registrar of Motor Vehicles to determine the appropriate logo and words that are displayed on the plates.

In addition to the contribution, the person receiving the specialty license plate must pay an annual \$10 Bureau of Motor Vehicles (BMV) fee. The purpose of the BMV fee is to compensate the BMV for the additional services required to issue each specialty license plate. The BMV fee is deposited into the existing Public Safety – Highway Purposes Fund. All other registration requirements apply to the new plates. The new plates may be issued for passenger cars, noncommercial motor vehicles, recreational vehicles, and any other vehicle of a class approved by the Registrar of Motor Vehicles.

The new specialty license plates created by the bill are set forth in the following table, which includes a description of each:
