**Version:** As Passed by the House

**Primary Sponsor:** Rep. Carfagna

Kelly Bomba, Attorney

### SUMMARY

- Allows governmental entities to employ distributed ledger technology, including blockchain technology.

### DETAILED ANALYSIS

#### Governmental use of distributed ledger technology

The bill provides that governmental entities may use distributed ledger technologies, including blockchain technology, in the exercise of their authority.<sup>1</sup> “Distributed ledger technology” is not defined in the bill, but, generally, a distributed ledger is a completely decentralized database that is shared and maintained by each individual computer on a network. Put another way, distributed ledger technology is a very specific kind of recordkeeping technology in which each user has an up-to-date copy of a database, and there is not a centrally kept “official” version. A distributed ledger is useful for recording certain types of information such as transactions or changes in ownership without the need for a central authority to verify the information.<sup>2</sup>

Under the bill, a “**governmental entity**” means the state or a political subdivision, both of which are also defined. “**State**” means the State of Ohio and includes:

- The General Assembly;

<sup>1</sup> R.C. 9.16(B).

<sup>2</sup> Yosef Schiff, *Legislative Service Commission Members Only Brief: Blockchain Technology and Virtual Currency* (March 12, 2019), <https://www.lsc.ohio.gov/documents/reference/current/membersonlybriefs/133Blockchain%20Technology.pdf> (accessed December 14, 2020).

- The Supreme Court;
- The offices of all elected state officers;
- All departments, boards, offices, commissions, agencies, colleges and universities, institutions, and other instrumentalities of the state.

A “**political subdivision**” is a municipal corporation, township, county, school district, or any other body corporate and politic that is responsible for government activities in a geographic area smaller than the state. The definition includes a long list of specific examples, such as county hospitals, but those examples do not limit the definition’s reach.<sup>3</sup>

For a more in-depth description of distributed ledger technology and blockchain technology, see the LSC *Members Only* Brief, [Blockchain Technology and Virtual Currency](#). In addition to the preceding hyperlink, it can be found at [www.lsc.ohio.gov](http://www.lsc.ohio.gov), under “Popular Publications.”
